LUXEMBOURG - Let's make it happen!

OPEN, RELIABLE, DYNAMIC

The Grand Duchy of Luxembourg is a world renowned secure and reliable hub for cross border businesses in a number of sectors including finance, logistics, automotive components, ICT, life sciences and clean technologies. Acting as a gateway to Europe and beyond, Luxembourg's multilingual and multicultural character makes it a prime business location. Global players of all sizes use the country as a base benefiting from nearby decision-making centres and access to worldwide markets.

A forward thinking country, Luxembourg has embraced Jeremy Rifkin's blueprint for a **third industrial revolution** designed to ensure a resilient and sustainable economy by 2050, thanks to a fully interconnected ecosystem encompassing intelligent transport, renewable energy and new communications technology. Luxembourg is about to become the very first country to create a framework for a **circular economy** and to integrate its principles into public procurement markets. Its financial services industry already leads the world in the listing of green bonds and is first in establishing itself as a hub for climate finance.

Most recently, this audacity has taken a dramatically new dimension with the proclaimed ambition of Luxembourg, already the global leader in satellite communications and broadcasting, to become a major player in the management and use of space resources. That will be a potent topic for the 2020 Universal Exposition in Dubai, under the theme of "Connecting Minds, Creating the Future" - in which Luxembourg is, not surprisingly, one of the first announced participants.

A MAGNET FOR TALENT

Luxembourg has been importing knowledge for decades, as it attracts both talented expats and cross-border commuters. The result is one of the most international countries in the world, with 47% of the population being non-Luxembourgish. Cross-border thinking, mobility and the cosmopolitan nature of its working population contribute to the country's high productivity. Due to the language skills of their workforce, companies speak their customers' language, a significant advantage. German, French and Luxembourgish are official languages and English is also a widely spoken, particularly for business. As well, there are native speakers from more than 170 countries.

A UNIQUELY ATTRACTIVE BUSINESS ENVIRONMENT

Political and social stability, a skilled, multilingual workforce, state-of-the-art infrastructures, excellent connectivity to markets, and a competitive legal and regulatory environment come together to make an ideal place for international businesses to grow. For example, ArcelorMittal, the world's largest steelmaker, satellite communications giants SES and Intelsat, automotive components maker Delphi, chocolatier Ferrero, tech-firms Amazon, Skype, PayPal and eBay, RTL Group, the leading European radio and TV broadcaster, and Cargolux, the world's leading all-cargo carrier, all have their global or European headquarters here.

AN INNOVATION LEADER

A main factor in Luxembourg's success is the country's ability to react quickly to new opportunities. The Government and public authorities maintain a close and on-going dialogue with all businesses. This proximity combined with an attitude of flexibility creates an infrastructure and legal framework designed to help businesses grow while protecting the consumer.

Encouraging research, development and innovation is also a national priority, and successive governments continue to invest heavily. Both private and public research is supported. Companies receive backing to help them achieve innovative new products, services and processes. They also work together with a range of business-focused public research institutes. The exciting national start-up ecosystem is growing rapidly. Start-ups and growth firms are offered space and expertise to help them develop and accelerate at several publicly-funded business incubators.

Luxembourg has played a major role in the rise of IT infrastructures, the Cloud, Fintech and Biotech. In addition, the country has set no less of a goal than to fully become "Smart Nation", a nation that leverages technology and superb interconnectivity to improve quality of life through an exceptional work force that is multilingual, highly skilled cosmopolitan, and entrepreneurial.

Which country in the world was first to embrace Jeremy Rifkin's vision and apply it to its economy and society? Luxembourg is an ideal test-bed to combine information technology, renewable sources of energy and smart transport networks.

Which country has the ambition to be a leader in the utilisation of space resources for the benefit of humankind? Luxembourg's skills in mining, finance and space, strengthened by its vision, position the country as the logical choice to develop a suitable legal framework to allow this to happen.

Which university has managed to rank as one of the top ten international universities in the world within less than 10 years? Luxembourg's university, a stunning innovation and research

campus that has become one of Europe's foremost centers for technology and biomedical collaborations between public and private actors.

There are endless examples. In today's world, it is not the technical infrastructure alone that matters. It is the qualitative aspects such as social skills that are key and that are highly valued by business. Apply this to an entire country, and an exceptional ecosystem unfolds. Luxembourg cultivates diversity in all its forms and is committed to collective knowledge offering world of opportunity for advancement to individuals and companies.

A CROSS-BORDER SPECIALIST

Paris is two hours away by high-speed train, and regular flights to London, Barcelona, Zurich and Milan take about 90 minutes. Frankfurt, Brussels and Amsterdam are closer still. Located in the heart of Europe, it is the ideal gateway to a market of more than 500 million consumers and 60% of the European Union's GDP can be reached by road in less than a day, or a couple of hours by air. In particular, Luxembourg is a prime access point for accessing leading industrialised economies in Europe, especially the neighbouring countries Germany, France and Belgium.

A GREAT PLACE TO WORK AND LIVE

Geographically, Luxembourg is the beautiful green heartland of Europe and a strategic smart

business location with a national character of openness, dynamism, reliability. International studies on the competitiveness of countries consistently rank Luxembourg among the first.

When it comes to career prospects, there is a world of opportunities in Luxembourg. The country has been voted a top ranking place to work and live in multiple international surveys offering a stable economy, safe jobs and a healthy work-life balance.

Almost half of the population comes from all over the world. This is the case all the more so in Luxembourg City where **three quarters of the inhabitants come from another country**. This is a very common situation in schools, where children get along together quite naturally and rapidly adopt a very international culture.

This high makeup of foreigners coupled with the country's exceptional **multilingualism** has always given Luxembourg's politicians and entrepreneurs an extraordinary ability to understand their interlocutors and to take on a role as mediator in international relations.

This capacity to look outwards explains why Luxembourg has been a founding member of some of the most important international organisations and continues to play an important role still today.

THE CHAMBER OF COMMERCE OF THE GRAND DUCHY OF LUXEMBOURG

Just two years after the Grand Duchy of Luxembourg gained independence, King Grand Duke William II issued a decree on 1st of October 1841 establishing the Chamber of Commerce. This represented the first manifestation of autonomy for a state now required to manage its own affairs.

As a professional chamber and public institution encompassing all sectors of business other than agriculture and the handicraft industry the Chamber of Commerce conceives its rationale and its role as guardian of the interests of its affiliated companies. These often constitute a motley group with divergent sectoral interests. That is why, in a spirit of fairness to all its members, the Chamber of Commerce sees its primary mission in the articulation, the representation and the defense of the general economic interest of all its members.

In the Grand Duchy of Luxembourg, membership of the Chamber of Commerce is mandatory for all self-employed individuals, commercial companies, and branches of foreign companies established in Luxembourg and undertaking a commercial, financial or industrial activity.

The Chamber of Commerce has more than 90,000 affiliated members, representing 75% of total employment and 80% of GDP. International Affairs is one of the five service areas of the Chamber of Commerce. Its primary task is to support companies in foreign markets. This active support in conquering new markets takes various forms, including economic promotion missions.

Finally, the Chamber of Commerce receives foreign delegations and offers specialist advice in connec-

tion with foreign markets. It also publishes a Market Guide, available online (www.guidedumarche.cc.lu), listing several hundred Luxembourg companies seeking to establish contacts abroad.

The Chamber of Commerce of the Grand Duchy of Luxembourg is a founding member of Luxembourg for Business and Innovation and Luxembourg for Finance.

OUR SERVICES

E-fulfillment

Our core business is to provide logistics services for the e-commerce business. As a fulfillment house, we receive goods from the suppliers, control them and put them into stock. system, allowing full real-time visibility on stock status and order processing via a secured internet link.

Cross-docking

Speed is important in e-logistics. Our cross-dock services allow to receive consolidations of pre-packed orders, or consolidated fit-to-order quantities that are stripped upon arrival and put directly into the shipping area without going into storage locations.

Returns Management

Returns' treatment is a strategic factor in achieving customers' loyalty. Fast processing inspires confidence and avoids a considerable part of doubt and frustration. 2 Point 0 has organised return addresses in different countries in order to reduce distance between your customer and yourself. Upon arrival in our warehouse, returns

are registered in our IT system with instant visibility via a secured internet link. Consolidated shipments to your premises can be organised with negotiated frequency in order to optimise transport cost.

Warehousing

Our premises are located in the south of Luxembourg. The modern warehouse is equipped with recently installed intrusion and fire alarm systems. All storage locations are bar-coded in order to ensure efficient goods retrieval. The warehouse management system allows FIFO and FEFO handling, as well as registration of serial numbers, lot numbers and/or expiration dates.
