The Future of the Last Mile Delivery: Digitize your Processes

Discussion and Feedback Round

Date: Thursday, February 22nd 2024

Time: 16h00-17h30

Location: Tomorrow Street

15 Rue Edward Steichen, L-2540 Neudorf-Weimershof Luxembourg

In January 2024, **Gulliver launches a new map feature** using Google Maps map and services in their application for streamlined transportation and logistics management “G-Transport”. By doing so, Gulliver will have a solution, which is more adaptable to the needs of the market.

Gulliver cordially invites you to join a discussion and feedback round on February 22nd 2024, about G-Transport. The feedback is decisive in developing new features that help logistics companies in their pursuit of better services and efficient processes.

About Gulliver:

Gulliver is a dynamic tech company with over 23 years of experience in mobile projects and cutting-edge technologies. Gulliver stands as a pioneering force in the logistics sector. Catering to 350+ large enterprises and 2,000+ SMEs globally, Gulliver is at the forefront of providing digital solutions that enhance efficiency and transparency in logistics operations. As industry leaders in Italy, they specialize in empowering logistics companies, ranging from those with 10 trucks to over 1.000, including prominent players in Europe.

In Luxembourg, they collaborate as a LuxTrust partner and actively engage in R&D initiatives with the University of Luxembourg about AI applied to logistics. Gulliver transforms enterprises by streamlining operations, boosting profitability, and notably improving transparency via real-time data, including the eco-friendly advantage of a fully digital system. This ensures a cutting-edge impact on logistics efficiency while promoting environmental sustainability through a paperless approach.

About G-Transport:

G-Transport is a dynamic mobile solution for streamlined transportation and logistics management. This modular, customizable, and multi-platform solution seamlessly integrates with leading map systems, ensuring functionality even without an internet connection. G-Transport allows the convenience of planning and monitoring trips, as well as tracking vehicle positions in real-time through the user-friendly web application. Moreover, the application allows accessing and reviewing digital documents, including signed shipment notes and proofs of delivery, effortlessly within the app.

Program

16h00-16h10	Welcome & Introduction
